UNITED STATES CALENDAR,

FOR THE YEAR OF OUR LORD

1816:

BEING THE FORTIETH OF THE INDEPENDENCE OF THE UNITED STATES.

ASTRONOMICAL CALCULATIONS
BY NATHAN DABOLL.

COMPLED UNDER THE INSPECTION OF THE SECRETARY

OF THE STATE OF CONNECTICUT,

NEW-LONDON:

PRINTED AND SOLD BY SAMUEL GREEN.

OBSERVATION.

THE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing:

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day; and double the time of the sun's rising will be the length of the night.

PHI BETA KAPPA.

The Phi Beta Kuppa Society was founded at the University of Oxford in England. It was established in America, at the College of William and Mary in Virginia, on the 6th day of December 1776. A branch was instituted at Yale College in January, 1780; at Harvard College in July, 1781; and at Dartmouth College, in 1787. These branches are distinguished by the names of the Alpha of Connec icut, the Alpha of New-Mamphire. The branch in Virginia having become extinct, the three New-England Alphas are the only ones at present in America. No charter can be granted unless by the unanimous approbation of all the branches,

The objects of the Institution are to promote friendship and science among its members; and to excite emulation among the candidates for admission. Its influence upon the seminaries where it is established, has been eminently happy. No college honor is more anxiously sought for than an

admission into the Phi Beta Kappa.

OBSERVATION.

THE hour of the night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing : RILLE

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day; and double the time of the sun's rising will be the length of the night.

PHI BETA KAPPA.

The Phi Beta Kappa Society was founded at the University of Oxford, in England. It was established in America, at the College of William and Mary, in Virginia, on the 6th day of December, 1776. A branch was instituted at Yale College, in January, 1780; at Harvard College in July, 1781; and at Dartmouth College, in 1787. These branches are distinguished by the names of the Alpha of Connecticut, the Alpha of Massachusetts, and the Alpha of New-Humpshire. The branch in Virginia has since become extinct. No charter can be granted unless by the unanimous approbation of all the branches.

The objects of the Institution are to promote friendship and science among its members; and to excite emulation among the candidates for admission. Its inducence upon the seminaries where it is established, has been eminently happy. No college honor is more anxiously sought for, than an

admission into the Phi Beta Kappa.

OBSERVATION.

HE hour of the night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing :

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day; and double the time of the sun's rising will be the length of the night.

But if such vessels' crews consist of at least three fourths American citizens, the duty is but six cents per ton. Vessels of the United States, from foreign places, unless their officers and two thirds of their crews are citizens of the United States, pay 50 cents per ton.

OBSERVATION.

THE hour of the night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing :

RULE.

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day; and double the time of the sun's rising will be the length of the night.

Ecupses in the year 1819.

HERE will be four Eclipses this year, in the following order viz:

- 1. The first will be of the Moon, April the 10th, at \$h. 18m. in the morning; invisible
- 2. The second will be a large eclipse of the sun, April 24th in the morning, (visible if the air be clear,) by calculation and orthographic projection, as follows:

Beginning at 5 12 Apparent Middle 6 10 time in the morning.

The whole duration 1 h. 57 m. Quantity of greatest obscuration, 9 1-4 digits on the sun's northern limb.

3. The third will be of the Sun, September 19th at 8 h. 5 m. in the morning, but by reason of the moon's high northern latitude, the Penumbra will not reach the Diurnal path of our vertex, consequently the eclipse will be invisible to us.

4. The fourth will be of the Moon, October 3d, at 10 h. 35 m. in the morning, consequently in-

visible to us.

A candidate for an advanced standing, in addition to the preparatory studies, is examined in the various branches to which the class he proposes to enter have attended.

The stated time of examination for admission into college, is on the day preceding the public commencement. But persons may be examined, in any other part of the collegiate terms. It is requested they may not be offered in the vacations, except for very special reasons.

No one can be admitted to the Freshman class, till he has completed his fourteenth year; nor to an advanced

standing, without a proportional increase of age.

Testimonials of good moral character are in all cases required; and those who are admitted from other colleges. must produce certificates that they have been subjected to no collegiate censure. The students are not considered as regular members of the college, till, after a residence of at least six months, they have been admitted to matriculation, on satisfactory evidence of an unblemished moral character. Before this, they are only students on probation.

COURSE OF INSTRUCTION.

The whole course of instruction occupies four years.

In each year, there are three terms or cessions

in the chapel.

The Berkeleian Premium, of about fifty dollars a year, is given to the scholar in each class who passes the best examination in Latin and Greek; provided he resides as a graduate in New-Haven, one, two, or three years. Premiums are also given for Latin and English Composition, and Declamation in public

There are two public Examinations of the classes in year, one in May, the other in September; which are condinued from four to six days each. The candidates for degrees are also examined, at the close of their course of

study.

No student is allowed to be absent, without special leave, except in vacations.

PUBLIC WORSHIP.

Prayers are attended in the college chapel, every morning and evening, with the reading of the scriptures; when one of the Faculty officiates, and all the students are required to be present. They are also required to attend public worship in the Chapel on the Sabbath, except such as have permission to attend the Episcopal or other congregations in town.

EXPENSES.

The college bills are made up by the Treasurer and Steward, three times a year, at the close of each term and are presented to the students, who are required to present them to their parents, guardians, or patrons. I any student fails to comply with this requisition, he is no to be permitted to recite, till the bills are paid.

The annual charges in the Treasurer's bill, are,
For instruction.
For rent of a chamber is college,
For ordinary repairs and contingencies,
For general damages, sweeping, &c. about 1 60

\$43 00

Besides this, the student may be charged for damages done by himself, and a small sum for printing catalogues,

and other occasional expenses.

Board is furnished in commons, by the Steward, at about S2 25 a week: or 90 dollars a year, not including vacations. It varies, however, with the price of provisions. Wood is procured by the Corporation, and distributed to those students who apply for it, at cost and charces.

The students provide for themselves bed and bedding, furniture for their rooms, candles, books, stationary, and washing. There are also classical taxes, of a small amount, for fuel in the recitation rooms, catalogues, &c.—If books and furniture are sold, when the student has no farther necessity for them, the expense incurred by their use, will not be great.

The following may be considered as a near estimate of the necessary expenses, without including apparel, pock-

et money, travelling, and board in vacation.

Total, from \$180 to 220

Those who have their board and room in private families, will incur an additional expense of from 70 to 100 dollars a year. None are permitted to take lodgings in town, except when the rooms in college are not sufficient to accommodate all.

Students who wait in the Hall, are allowed two thirds of their board; and those who occupy recitation-rooms, save their fuel in winter, and receive a small compensa-

tion in summer.

With regard to apparel, and what is called pocket mon-

ey, no general estimate can be made.

No student is allowed to contract any debt, without a written permission from his patron, who is one of the Faculty. As a farther precaution against extravagance, parents at a distance frequently deposit funds with the parents.

fron; who, in that case, pays a particular attention to the pecuniary concerns of the student, settles his bills, corresponds with the parent, transmits an account of expenditures, &c. for which he charges a commission.

A person admitted to an advanced standing, unless coming from another college, pays a sum to the Trensurer, equal to the tuition-money which has been paid by others

of the class which he enters.

THE MEDICAL INSTITUTION.

The Instructers in the Medical Institution are a Professor of the Theory and practice of Physic and Surgery, a Professor of Materia Medica and Botany, a Professor of Chemistry and Pharmacy, and a Professor of Anatomy and Physiology. The Lectures commence the last week in October, and terminate the last week in March. During the course, from 80 to 100 Lectures are given by each Professor.

The Students have access to the Lectures on Natural Philosophy, Mineralogy, and Geology. A distinct course is given on Obstetricks, by the Professor of Anatomy and another on the Elements of Botany, by the Professor of that department. The Examination for licenses and degrees is held immediately after the close of the lectures.

The Institution is furnished with a Library and Anatomical Museum. The students have access also to the Li-

brary of the College.

The Fees, which are paid in advance, are twelve dollars and fifty cents for each course, except that on Mineralogy. The Matriculation Fee is five dollars. Roomerent in the Medical College is 5 dollars, which entitles the student to remain in the room during the year. The entire expense of a residence of five months, through the courses, including fees and all expenses, except clothing, is from 150 to 200 dollars a year.

The Medical students, during their residence in the Institution, are subject to the same moral and religious res-

traints, as those of the Academical College.

1820:

BEING THE FORTY-FOURTH OF THE IN-DEPENDENCE OF THE UNITED STATES.

ASTRONOMICAL CALCULATIONS
BY NATHAN DABOLL.

COMPILED UNDER THE INSPECTION OF THE SECRETARY

OF THE STATE OF CONNECTION.

NEW-LONDON:
PRINTED AND SOLD BY SAMUEL GREEN.

OBSERVATION.

TYHE hour of the night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing :

RULE.

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day; and double the time of the sun's rising will be the length of the night.

Eclipses in the year 1820.

HERE will be four Eclipses this year, two of the Sun and two of the Moon, in the following order, viz:

I. The first will be of the Sun, March 14th, at 8h. 34m, in the morning, to us invisible, by reason of the Moon's south lat.; but in lat. 56° 33' south, and long. 11° 43' W, the Sun will be centrally eclipsed on the meridian.—Moon's lat. 42' 9-10 S.

II. The second will be of the Moon, March 29th, at 1h.

59 m. afternoon, to us invisible.

III. The third will be of the Sun, Sept. 7th. at 9h. 5m. in the morning, to us invisible, although a very near appulse, and had this eclipse happened near the vernal equinox, and the relative situation of the Sun and Moon been the same in regard to latitude, declination, &c. we should then have had a very large visible eclipse; but happening near the autumnal equinox, the centre of the penumbra will travel over the earth in an oblique southerly direction, leaving America to the west; but at 1h. 51 m. after, the Sun will be 10 1-2 digits eclipsed at London; the centre of the Penumbra will enter Germany, passing over Embden, Venice, and Naples; will cross the Mediterranean Sea, passing over Grand Cairo, in Egypt, and the adjacent country; will leave the earth near the city of Bassora.

IV. The fourth will be of the Moon, Sept. 22d, visible

by calculation, as follows:

Beginning of the eclipse 0 26 Apparent time in the Ecliptic 8 2 1 the morning.

Whole duration 2 57

Digits eclipsed, 10 1-4 on the Moon's southern limb.

ELECTORS' MEETING

TERMS OF ADMISSION.

Candidates for admission to the Freshman class, are examined in Cicero's Select Orations, Clarke's Introduction to the making of Latin, Virgil, Sallust, the Greek Testament, Dalzel's Græea Minora, Adams' Latin Grammar, Goodrich's Greek Grammar, Latin Prosody, and Arithmetis.

A cardidate for an advanced standing, in addition to the preparatory studies, is examined in the various branches to which the class he proposes to enter have attended.

The stated time of examination for admission into college, is on the day preceding the public commencement — But persons may be examinatin any other part of the collegiate terms. It is requested they may not be offered in the vacations, except for very special reasons.

No one can be admitted to the Freshman Class, till he has completed his fourteenth year; nor to an advanced

standing, without a proportional increase of age.

Testimonials of good moral character, are in all cases required; and those who are admitted from other colleges must produce certificates that they have been subjected to no collegiate censure. The students are not considered as regular members of the college, tilf, after a residence of at least six mouths, they have been admitted to matriculation, on satisfactory evidence of an unblemished moral character. Before this, they are only students on probation.

COURSE OF INSTRUCTION.

The whole course of instruction occupies four years. |

In each year there are three terms or sessions.

The three younger classes are divided, each into two parts; and each of the divisions is committed to the particular charge of a Tutor, who, with the assistance of the Professors, instructs them. The Senior class is instructed by the President and Professors. Each of the four classes attends three recitations or lectures a day; except on Wednesdays and Saturdays, when they have only two. The following scheme gives a view of the authors recited each term.

In addition to the recitations in the books here specified. each class receives lectures from the Professor of Languages; the Junior Class attends a course of experimental lectures on Natural Philosophy; and the Senior Class, the courses on Chemistry, Mineralogy, Geology, and the principles of Natural Philosophy. The members of the several classes attend also, the private exercises and lectures of the Professor of Rhetoric and Gratory. Specimens of English Composition are exhibited daily by one or more of each of the divisions of the Sophomore and Junior classes. Written translations from Latin authors. are presented by the Freshman class. The lower classes are also instructed in Latin Composition. The Senior and Junior classes have Forensic Disputations twice a week, before their instructers. There are very frequent exercises in Declamation, before the Tutors, before the Professor of Oratory, and before the Faculty and students, in the chapel.

The Berkeleian Premium, of about fifty dollars a year,

is given to the scholar in each class, who passes the best examination in Latin and Greek ; provided he resides as a graduate in New-Haven, one, two, or three years. Premiums are also given for Latin and English Composition,

and Declamation in public.

There are two public Examinations of the classes in a year; one in May, the other in September; which are continued from four to six days each. The candidates for degrees are also examined, at the close of their course of study.

No student is allowed to be absent, without special

leave, except in vacations.

PUBLIC WORSHIP.

Prayers are attended in the college chapel, every morning and evening, with the reading of the scriptures; when one of the Faculty officiates, and all the students are required to be present. They are also required to attend public worship in the Chapel, on the Sabbath, except such as have permission to attend the Episcopal or other congregations in town.

EXPENSES.

The college bills are made up by the Treasurer and Steward, three times a year, at the close of each term; and are presented to the students, who are required to present them to their parents, guardians, or patrons. If any student fails to comply with this requisition, he is not to be permitted to recite, till the bills are paid.

The annual charges in the Treasurer's bill, are, For instruction. For rent of a Chamber in college, For ordinary repairs and contingences, For general damages, sweeping, &c. about 1 60

\$43 00

Besides this, the student may be charged for damages done by himself, and a small sum for printing catalogues, and other occasional expenses

Board is furnished in commons, by the Steward, at about \$2 25 a week; or 90 dollars a year, not including vacations. It varies, however, with the price of provisions. Wood is procured by the corporation, and distributed to those students who apply for it, at cost and char-

ges.

The students provide for themselves bed and bedding, furniture for their rooms, candles, books, stationary, and washing. There are also classical taxes, of a small amount, for fael in the recitation rooms, catalogues, &c.—If books and furniture are sold, when the student has no farther necessity for them, the expense incurred by their use, will not be great.

The following may be considered as a near estimate of the necessary expenses, without including apparel, pocket

money, travelling, and board in vacation.

Treasurer's bill, as	above,	-	3 - 14	843	43

Total, from \$180 to 220

Those who have their board and room in private families, will incur an additional expense of from 70 to 100 dollars a year. None are permitted to take lodgings in town, except when the rooms in college are not sufficient to accommodate all.

Students who wait in the hall, are allowed two thirds of their board; and those who occupy recitation rooms, save their fuel in winter, and receive a small compensation

in summer.

With regard to apparel, and what is called pocket mon-

cy, no general estimate can be made,

No student is allowed to contract any debt, without a written permission from his patron, who is one of the Faculty. As a farther precaution against extravagance, parents at a distance frequently deposit funds with the patron; who, in that ease, pays a particular attention to the pecuniary concerns of the student, settles his bills, corresponds with the parent, transmits an account of expenditures, &c. for which he charges a commission.

A person admitted to an advanced standing, unless com-

ing from another college, pays a sum to the Treasurer, equal to the tuition money which has been paid by others of the class which he enters.

THE MEDICAL INSTITUTION.

The Instructers in the medical institution are a Professor of the Theory and Practice of Physic and Surgery, a Professor of Materia Medica and Botany, a Professor of Chemistry and Pharmacy, and a Professor of Anatomy, and Physiology. The Lectures commence the last week in October, and terminate the last week in March. During the course, from 80 to 100 Lectures are given by each Professor.

The Students have access to the Lectures on Natural Philosophy, Mineralogy, and Geology. A distinct course is given on Obstetrieks, by the professor of Anatomy, and another on the Elements of Botany, by the Professor of that department. The Examination for licenses and degrees is held immediately after the close of the lectures.

The Institution is furnished with a Library and Anatom-

brary of the College.

The Fees, which are paid in advance, are twelve dollars and fifty cents for each course, except that on Mineralogy. The Matriculation Fee is five dollars. Roomernt in the Medical College is 5 dollars, which entitles the student to remain in the room during the year. The entire expense of a residence of five months, through the courses, including fees and all expenses, except clothing, is from 150 to 200 dollars a year

The Medical students, during their residence in the In-

straints, as those of the Academical College.
